

DAKOTA™

HIGH-DENSITY
STACKING
CHAIR

POLYPROPYLENE

The Dakota molded chair offers durability and versatility at an affordable price. It works in training rooms, lounges, cafeterias, auditoriums or in any application where flexibility and resistance to wear is required of a high-density stack chair.

The polypropylene shell cleans easily, making the Dakota molded chair particularly appropriate for the healthcare environment. Molded chairs stack 45 high and are available in the following poly colors: abracadabra, black, blue grey, bordeaux, café au lait, cayenne, flannel, grape, lemon cream, light tone, marine teal, moss, nordic, sand, splash, sunburst, tangelo, warm grey and wet sand.

The Dakota molded chair frame is sturdily constructed of a 7/16" solid steel rod that can be finished in bright duplex nickel chrome plating or electrostatically applied epoxy. Options abound, as molded chairs can be specified with or without plastic arms and are available with ganging glides, hard floor or soft surface glides.

Dakota's bookrack is constructed with a solid steel rod and finished in bright duplex nickel chrome only. Bookracks are field installable.

Ganging glides on the armless Dakota chairs are constructed of durable, clear polycarbonate.

Dakota arm chairs feature strong arm uprights with injection molded polypropylene arm caps.

Chairs have soft surface glides available, eliminating marring on most floor surfaces.

Choose from a variety of glide options available to suite all floor surfaces: stainless steel, non-skid (PVC), polycarbonate, ganging polycarbonate and ganging steel.

FIXED SEAT & BACK

Flexibility, mobility and comfort are key buzzwords when describing the Dakota padded seat and back chairs. It's easy to see what the buzz is all about. Removable upholstered seat and backrest pads - upholstered over a 1/2" foam and composite base - allow for future fabric upgrades.

The seat and backrest cushions are made for comfort. A transport dolly moves Dakota out of the way when necessary. The padded seat and back stacks 16 high.

The chair seats and backrests are constructed of injection-molded polypropylene. Dakota frames are available in the following colors: abracadabra, antique vein, black, blue grey, bordeaux, bronze metallic, café au lait, cayenne, chamomile, champagne metallic, chrome, cottonwood, creamy white, dolphin, espresso metallic, flannel, grape, lemon cream, light tone, malachite metallic, marine teal, moonbeam metallic, moss, nickel vein, nordic, old gold metallic, sand, splash, starlight silver metallic, sunburst, tangelo, thermal, warm grey, wet sand and whisper.

Tablet arm flips up to allow easy access to and from the seated position. Tablet arms are filed installable (N/A chairs only).

Dakota's oversized tablet arm is 20 1/2" long and 17" wide.

Dakota's standard tablet arm is 20 1/2" long and 12" wide.

Cushioned/upholstered fixed seat and back pads add comfort to the individual user.

Cushions are replaced or repaired easily by removing seat and backrest fasteners.

STACKING/DOLLY

Flexibility and mobility will meet everyone's needs. High-density stack seating and transport dollies make space reconfiguration easy. Quick and easy set up or tear down makes stack seating perfect for meetings, classes, registrations or special events. Best of all, their density means you can store a lot in a small space.

The Dakota dolly measures 22 3/8" wide by 25 5/8" deep. In addition, the large 5" durable hard rubber wheels (two fixed and two swivel) on the dolly make moving a loaded dolly a breeze.

The poly chair Dakota dolly (MXD.BL) stacks 45 chairs high, to a height of 79". The upholstered fixed seat and back dolly (MVP.BL) stacks 16 chairs high, to a height of 63 1/2". Dakota chairs with just a fixed seat can stack 15 chairs high on the MVP.BL dolly, to a height of 60". Dollies are available in black only.

MVP.BL DOLLY

MXD.BL DOLLY

Fabric on upholstered models is protected by special stacking bumpers.

Dakota's poly chair standard stacking bumper keeps the chair frames from rubbing together when stacked.
